

Sadhana D. Ramani

Portfolio Link: <https://sdramani.github.io/>

EDUCATION

University of Southern California (USC) - Graduated May 2026

- Major: Bachelor of Science in Computer Science (Games)
- Minor: Technical Game Art based in Maya and Unity
- GPA: 3.87

Clubs: Trojan Marching Band (Color Guard)

ITP485 - Video Game Engines (HLSL shaders, custom engine based on SDL graphics in DirectX)

ITP438 - Advanced Gameplay Programming in Unreal Engine (Blueprints, GAS, UI, Multiplayer Networking)

WORK EXPERIENCE

USC — ITP380/485 Learning Assistant

01/2024 - 06/2026

- Debugged and resolved technical issues in student C++ code related to gameplay functionality.
- Provided guidance and support to students to enhance their understanding of complex programming concepts.

RELATED PROJECTS

After Hours Library & Tavern Tycoon- UE5 Gameplay Engineer

07/2026 - PRESENT

- Worked in UE 5.4/5.5 to build a first person horror game and 3rd person management sim for Kemono Studio
- Cooperated with other programmers, designers and artists on teams of 30+ people to develop gameplay features
- Used C++ and Blueprints to build gameplay systems for gameplay and level design needs

Void Watch - Unity Gameplay and Systems Engineer

05/2026 - PRESENT

- Worked in 2D Unity to implement a fluid space-based action rogue-like, focused on upgrade and stats
- Cooperated with other programmers, designers and artists to improve game-feel and motion

City Witch - Lead Programmer and Systems Engineer

07/2025 - PRESENT

- Worked in 2D Unity to create an arcade-style action game with a paper craft aesthetic and Unity HLSL shaders
- Cooperated with a small interdisciplinary team to develop the game from prototype to demo release

Cemented Dreams — UE5 Gameplay Programmer

07/2025 - 05/2026

- Worked on a Unreal Engine action parkour game in C++ and Blueprint with GAS and UI interactions
- Created interaction systems for designers to activate architecture transformations
- Worked on checkpoint and goal activation systems that interface with the player throughout the game

The Unrealtor — Unity Gameplay and UI Developer

07/2025 - 05/2026

- Worked on a 3D Unity puzzle adventure game in C# with a 25 person interdisciplinary team
- Created puzzle prototypes and integrated Yarn dialogue plug-in and FMOD with other game features

Alibi — Unity Gameplay Developer

05/2024 - 5/2025

- Worked on a Unity point-and-click adventure game in C# with a 20 person interdisciplinary team
- Created many mini-levels and gameplay sections based on Design team instructions

SKILLS

- **Programming Languages:** C++, Java, Python, C#, Blueprint
- **Tools and Software:** Unity, Maya, Clip Studio Paint, Perforce, Unreal Engine (UE5), Trello, Jira
